A Sharper Choice on North Korea
An Independent Task Force, chaired by Mike Mullen and Sam Nunn, finds that the United States’ policy of “strategic patience” with North Korea will neither stop the country’s dangerous cycle of provocation nor ensure the stability of Northeast Asia in the future. The Task Force report recommends revising U.S. policy toward North Korea to break the cycle of North Korean aggression.

New Discussion Papers

A Winning Trade Policy for the United States
Protectionism will erode the United States’ edge as the world’s most innovative economy and will not help workers displaced by technological change and an increasingly globalized market, contend Edward Alden and Robert E. Litan. Instead, the United States needs trade and economic policies that create new opportunities in fast-growing foreign markets.

Women in Tech as a Driver for Growth in Emerging Economies
The gap between the demand for tech workers and the supply of job seekers with the necessary technical skills threatens the ability of emerging economies to participate in the digital market. Catherine Powell and Ann Mei Chang argue that increasing women’s access to tech jobs in low- and middle-income countries can help solve labor shortages, empower women, and grow the economy.

New Policy Innovation Memos

Closing the Gender Gap in Development Financing
Despite evidence that investment in women and girls helps with poverty eradication and economic growth, efforts to promote gender equality are chronically underfunded. Rachel B. Vogelstein outlines how the United States can close the gender gap in development financing.

Reconfiguring USAID for State-Building
Max Boot and Michael Mikulaciq propose that the U.S. Agency for International Development lead the effort to foster better-functioning institutions in chaotic countries. However, the agency should limit its efforts to strategically important states while focusing on building core state functions.

Reforming the U.S. International Military Education and Training Program
The IMET program, which allows members of foreign militaries to take classes at U.S. facilities, has the potential to be a powerful tool of U.S. influence. Joshua Kurlantzick explains how the program can be reformed.

New Contingency Planning Memo

Strategic Reversal in Afghanistan
Recent developments in Afghanistan have increased concerns about the collapse of the Afghan government and the growing strength of the Taliban. Seth G. Jones recommends that the United States address economic grievances and sustain U.S. military levels while supporting Afghan defense forces.

New CFR Books

The Man Who Knew
The Life and Times of Alan Greenspan
By Sebastian Mallaby
Sebastian Mallaby’s recent biography of Alan Greenspan, shortlisted for the Financial Times and McKinsey Business Book of the Year Award, brings into vivid focus the mysterious point where the government and the economy meet. To understand Greenspan’s story is to see the economic and political landscape of the last thirty years in a whole new light.

A Great Place to Have a War
America in Laos and the Birth of a Military CIA
By Joshua Kurlantzick
In a definitive account of the secret war in the tiny Southeast Asian nation of Laos, Joshua Kurlantzick uses recently declassified records and extensive interviews to chart the two decades–long war that forever changed the CIA’s controversial role in foreign policy.

Failure to Adjust
How Americans Got Left Behind in the Global Economy
By Edward Alden
In a compelling history of the last four decades of U.S. economic and trade policies, Edward Alden discusses how the United States can reassert itself as the leader in setting rules for international economic competition to broaden the benefits of global trade and investment.

New Cyber Briefs

Using Incentives to Shape the Zero-Day Market
In response to the rising threat of cyberattacks, the U.S. government should create incentives for individuals, companies, and governments to find and patch software vulnerabilities. Adam Segal explains why attempts to regulate the buying and selling of zero-day vulnerabilities are bound to fail and recommends that policy should focus on bug disclosure and mitigation of known threats.

A New Framework for Cross-Border Data Flows
The flow of data across international borders creates jurisdictional challenges and causes international tensions. Increasingly, countries have responded by imposing new requirements to store data locally, threatening cross-border data flows, which generate approximately $2.8 trillion in gross domestic product globally each year. Karen Kornbluh argues that the United States should take the lead in addressing these tensions.

New Corruption Brief

Improving U.S. Anticorruption Policy in Nigeria
Corruption is endemic in Nigeria. And although the United States and Nigeria have been close partners since Nigeria’s democratic transition in 1999, elite corruption has undermined diplomatic relations and U.S. investments in the nation’s development and security. Matthew T. Page discusses the actions the United States should take in curbing down on high-level corruption.
